SUBJECT INDEX FOR VOLUME 28

Acidosis, stromal, physiologic changes to cornea with contact lens wear and, 12
Adhesion, bacterial, extended wear soft contact lenses and, 157
Angle closure glaucoma, acute, choroidal melanoma and, 77
Anisocoria, electrical injury and, 224
Annexin V, binding to corneal epithelial cells, after overnight contact lens wear, animal study, 48
Anterior chamber angle, metallic foreign body in, 9
Aphakia, childhood
  contact lenses for correction of, 28
  silicone contact lenses effects, after congenital cataract, 31
Artificial tears, dry eye symptoms, Refresh Plus *vs.* Bion Tears, myopic LASIK patients, 96
Astigmatism, myopia and, results of combined LASIK treatment and retreatments, 55

Bacterial adhesion, extended wear soft contact lenses and, 157
Biomicroscopy, metallic foreign body in anterior chamber angle, 9

Canalicular occlusion, Herrick Lacrimal Plug effects, 206
Candida albicans, contact lens-related fungal keratitis, 149
Cataract
  congenital
    contact lenses for correction of, 28
    silicone contact lenses effects in aphakia after, 31
  electrical injury and, 224
  resident-performed extraction, retained lens fragments in, 44
  surgery, clear-cornea, methicillin-resistant *Staphylococcus aureus* ulcer after, 109
Children, aphakia
  contact lenses for correction of, 28
  silicone contact lenses effects in, after congenital cataract, 31
Colored filters/lenses
  vision-related quality of life, 128
  visual performance and, 80
Conjunctival flora, frequent-replacement contact lens effects on, 94
Conjunctivitis, papillary, gas-permeable contact-induced, nitric oxide levels in tears, 5
Contact lenses
  bifocal, visual performance effects, comparison with multifocal lenses, 88
  care regimens, cytotoxicity of, 160
  childhood aphakia correction role, 28
  corneal endothelial bleb formation, Asian *vs.* non-Asian patients, 101
  corneal physiologic changes induced by, 12
  corneal warpage induced by, refractive surgery and, 169
  disinfection regimens, cytotoxicity of, 160
  extended wear of, indentations of corneal epithelium after, 177
  extended-wear
    corneal inflammation and bacterial keratitis, 62
    microbial keratitis and (editorial), 1
    model development, animal study, 119
    soft, *Pseudomonas aeruginosa* and *Serratia marcescens* in, 157
  frequent-replacement
    conjunctival flora and, 94
    microbial keratitis and, 165
    microbiologic evaluation of, 192
    replacement schedule and care regimen influence on patient satisfaction, 124
  fungal keratitis and, 149
  gas-permeable
    daily-wear rigid, polymegethism and pleomorphism induced by, 40
    nitric oxide levels in tears in papillary conjunctivitis induced by, 5
    pellucid marginal corneal degeneration management role, 140
    poly(ethylene glycol) chain effects on surface exchange, 181
  globe luxation and, 2
  health belief and health practices in wear of, 36
  hydrogel, frequent-replacement, microbial keratitis and, 165
  lid-wiper epitheliopathy and dry eye symptoms in, 211
  long-term wear of, corneal thickness effects, 217
  multifocal
    aberrations induced by, assessment of, 196
    visual performance effects, comparison with multizone bifocal lenses, 88
  multipurpose solutions
    comparison by sodium fluorescein permeability assay, 151
    patient acceptance comparison study, 186
  Nocardia asteroides sclerokeratitis and, case report, 66
  overnight wear, annexin V binding to corneal epithelial cells after, animal study, 48
  pregnancy, herpes simplex virus, and (letter), 105
  prosthetic, ruptured radial keratotomy incision with iris drainage and, case report, 107
  soft
    corneal characteristics effects on selection, 202
    Mycobacterium chelonae keratitis associated with, 228
    ocular protection after keratoprosthesis and, 72
  tear-film osmolarity comparison, 174
Contrast sensitivity, tinted lenses and, visual performance effects, 80
Cornea
  characteristics of, soft contact lens selection and, 202
  inflammatory reactions of, contact lens oxygen transmissibility and, 62
  intraocular pressure measurement after hyperopic LASIK, 136
  perforation, herpes simplex reactivation after laser as cause of, 69
  physiologic changes with contact lens wear, 12
  thickness, pachymetry technique comparison, 221
  thickness and topography, SoftPerm lenses effects on, keratoconic *vs.* normal corneae, 83
  thickness of, long-term contact lens wear effects on, 217
  ulcer, keratoplasty effects in infectious keratitis and, 111
Corneal degeneration, pellucid marginal, gas-permeable contact lenses role in management, 140
Corneal endothelium, bleb formation in contact lens wear, Asian *vs.* non-Asian patients, 101
Corneal epithelium
  annexin V binding to, after overnight contact lens wear, animal study, 48
  indentations of, after extended wear of contact lenses, 177
  polymegethism of, induced by gas-permeable contact lenses, 40
Cytokines, extended wear contact lens development, animal study, 119

Diagnosis, infectious keratitis, corneal *vs.* contact lens cultures for organism identification in, 146
Disinfection, regimen for, contact lenses, cytotoxicity of, 160

Dry eye
lid-wiper epitheliopathy and, in contact lens wearers, 211
Refresh Plus *vs.* Bion Tears effects on, in myopic LASIK patients, 96

Edema
cystoid macular, resident-performed cataract extraction and, 44
stromal, physiologic changes to cornea with contact lens wear and, 12
Editorials, 1, 61
Electrical injury, ocular manifestations of, 224
Endophthalmitis, metallic foreign body in anterior chamber angle and, 9
Endothelium, physiologic changes to cornea with contact lens wear and, 12
Epitheliopathy, lid-wiper, dry eye symptoms and, in contact lens wearers, 211
Epithelium, corneal, polymegethism of, induced by gas-permeable contact lenses, 40
Eyeball, anterior dislocation of, contact lenses and, 2

Flora, conjunctival, frequent-replacement contact lens effects on, 94
Foreign body, metallic, in anterior chamber angle, 9

Glaucoma, acute angle, choroidal melanoma and, 77
Globe luxation, contact lens placement and, 2

Herpes simplex
contact lenses, pregnancy, and (letter), 105
reactivation after laser, as cause of corneal perforation, 69
Herrick Lacrimal Plug, occlusion of lacrimal canaliculus, 206
Hygiene, contact lens wear and, 36
Hypercapnia, physiologic changes to cornea with contact lens wear and, 12
Hypoxia, physiologic changes to cornea with contact lens wear and, 12

Inflammatory reactions, contact lens oxygen transmissibility and, 62
Intraocular pressure, measurement of, after hyperopic LASIK, 136
Iritis, electrical injury and, 224

Keratectasia, long-term wear of contact lenses effects on corneal thickness and, 217
Keratectomy, photorefractive/phototherapeutic, Thygeson's superficial punctate keratopathy and, 172
Keratitis
bacterial, contact lens oxygen transmissibility and, 62
fungal, contact lens-related bilateral, 149
infectious
corneal *vs.* contact lens cultures for organism identification in, 146
therapeutic keratoplasty effects, literature review, 111
microbial
hydrogel lenses and, 165
risk factors (editorial), 1
Mycobacterium chelonae, soft contact lens wear and, 228
Keratoconia, SoftPerm lenses effects on corneal thickness and topography and, 83
Keratoconus, long-term wear of contact lenses effects on corneal thickness and, 217
Keratocyte loss, long-term wear of contact lenses effects on, 217
Keratopathy, Thygeson's superficial punctate, photorefractive keratectomy/phototherapeutic keratectomy effects, 172
Keratoplasty, for infectious keratitis, literature review, 111
Keratoprosthesis, contact lens role in ocular protection after, 72

Lacrimal canaliculus, Herrick Lacrimal Plug for occlusion of, 206
LASIK
dry eye symptoms, Refresh Plus *vs.* Bion Tears effects on, 96
herpes simplex reactivation after, as cause of corneal perforation, 69
hyperopic, intraocular pressure measurement after, 136
myopic astigmatic, results of combined treatment and retreatments, 55
Lens fragment, retained, in resident-performed cataract extraction, 44
Letter to the editor, 105
Lid-wiper epitheliopathy, dry eye symptoms and, in contact lens wearers, 211

Macular cyst, electrical injury and, 224
Melanoma, choroidal, acute angle closure glaucoma and, 77
Microbes, keratitis, risk factors (editorial), 1
Microbiology
frequent-replacement contact lenses, 192
infectious keratitis, corneal *vs.* contact lens cultures for organism identification in, 146
Microcysts, physiologic changes to cornea with contact lens wear and, 12
Mucin balls, after extended wear of contact lenses, 177
Mycobacterium chelonae keratitis, soft contact lens wear and, 228
Myopia, astigmatism and, results of combined LASIK treatment and retreatments, 55

Neovascularization, physiologic changes to cornea with contact lens wear and, 12
Nitric oxide, levels in tears, in papillary conjunctivitis induced by gas-permeable contact lenses, 5
Nocardia asteroides sclerokeratitis, in contact lens wearer, case report, 66

Optical aberrations, multifocal contact lenses and, 196
Orbscan pachymetry, comparison with ultrasonic pachymetry, 221
Oxygen transmissibility
contact lens, bacterial keratitis and inflammatory reactions, 62
corneal endothelial blebs in contact lens wear, Asian *vs.* non-Asian patients, 101

Pachymetry, technique comparison, 221
Pars plana vitrectomy, resident-performed, retained lens fragment in, 44
Patient satisfaction
frequent-replacement contact lenses, replacement schedule and care regimen effects, 124
multipurpose solutions, comparison study, 186
Perforation, corneal, herpes simplex reactivation after LASIK as cause of, 69
Photochromic lenses, vision-related quality of life evaluation, 128
Pleomorphism, induced by gas-permeable contact lenses, 40
Poly(ethylene glycol) chain, surface exchange of gas-permeable contact lenses and, 181
Polymegethism
corneal endothelial, induced by gas-permeable contact lenses, 40
physiologic changes to cornea with contact lens wear and, 12
Pregnancy, herpes simplex, contact lenses, and (letter), 105
Pseudomonas aeruginosa
extended wear soft contact lenses and, 157
keratitis, frequent-replacement contact lenses and, 165

Quality of life, vision-related, photochromic lenses and, 128

Radial keratotomy, ruptured incision with iris drainage, prosthetic contact lenses role in treatment, case report, 107
Red eye, contact lens-associated, 157
Refractive surgery, contact lens-induced corneal warpage resolution before, 169
Rhegmatogenous retinal detachment, resident-performed cataract extraction and, 44

Sclerokeratitis, *Nocardia asteroides*, in contact lens wearer, case report, 66
Serratia marcescens, extended wear soft contact lenses and, 157
Silicone hydrogel lenses, extended wear of, indentations of corneal epithelium after, 177
Silsoft, childhood aphakia correction role, 28
Sodium fluorescein permeability assay, multipurpose solution comparison, 151
SoftPerm lenses, corneal thickness and topography and, keratoconic *vs.* normal corneae, 83
Solution, multipurpose
  comparison by sodium fluorescein permeability assay, 151
  patient acceptance comparison study, 186

Tear-film osmolarity, in contact lenses, comparison study, 174
Tears, nitric oxide in, gas-permeable contact-induced papillary conjunctivitis and, 5
Thygeson's superficial punctate keratopathy, photorefractive/phototherapeutic keratectomy and, 172
Tinted lenses, vision-related quality of life, 128
Trauma, metallic foreign body in anterior chamber angle and, 9

Ulcer, corneal
  keratoplasty effects in infectious keratitis and, 111
  methicillin-resistant *Staphylococcus aureus*, after clear-cornea cataract surgery, 109
Ultrasonic pachymetry, comparison with Orbscan pachymetry, 221

Visual performance
  contact lenses *vs.* multifocal lenses, 88
  tinted spectacle lenses effects on, 80

Warpage, corneal, contact lens-induced, refractive surgery and, 169
Water content, frequent-replacement contact lenses, microbial contamination and, 192
Wound infection, methicillin-resistant *Staphylococcus aureus*, after clear-cornea cataract surgery, 109

Zernike coefficients, multifocal contact lenses, aberrations induced by, assessment of, 196
